

STORMWATER PERMIT FEE SCHEDULE

The Stormwater Permit Application Fee is calculated as:

The total disturbed acreage equal to or exceeding 12,000 square feet multiplied by \$400.

For example:

2 acres X \$400	= \$800
1.125 acres X \$400	= \$450
1 acre = 43,560 square feet	= \$400*
0.5 acres (21,780 sf) X \$400	= \$200
0.275 acres (12,000 sf) X \$400	= \$110

Below 12,000 square feet, only impervious surface (such as for a rooftop, parking lot or driveway) of 5,000 square feet or more requires a permit at a flat fee of \$100.

For example:

0.25 acres (10,890 sf) of impervious surface added	= \$ 100
0.114 acres (5,000 sf) of impervious surface added	= \$ 100

Any impervious surface added of 12,000 square feet or more will be calculated as disturbed acreage.

Examples

Scenario 1:

0.25 acre lot = 10,890 sf you add	2,000 sf home 600 sf deck 100 sf storage shed <u>1,500 sf driveway (15' by 100')</u>	
Total impervious surface added:	4,200 sf	= No permit or permit fee required

Scenario 2:

0.25 acre lot = 10,890 sf you add	7,000 sf parking lot <u>900 sf entrance/exit</u>	
Total impervious surface added:	7,900	= Permit required with \$100 permit fee

Scenario 3:

5.81 acre lot = 253,083.6 sf you disturb (grade)	253,083.6 sf	= Permit required with \$2,324 permit fee
---	--------------	---

* Note: Fee schedule is comparable to Buncombe County's schedule for one acre and above.
